

SETTING UP A SOFTWARE DEVELOPMENT ENVIRONMENT ON WINDOWS 11

Primetek africa - Codecamp academy

Steps to Follow

1. Enable developer mode
2. Enable Windows Features

a. Windows Subsystem for Linux

```
dism.exe /online /enable-feature /featurename:Microsoft-Windows-Subsystem-Linux /all /norestart
```

b. Virtual Machine Platform

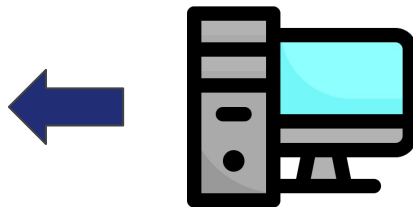

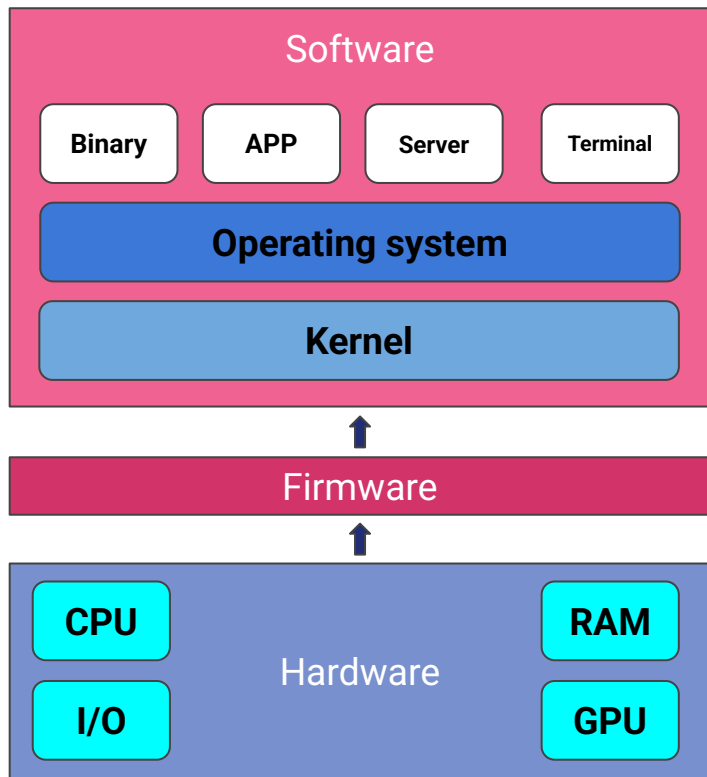

```
dism.exe /online /enable-feature /featurename:VirtualMachinePlatform /all /norestart
```

c. Windows Hypervisor

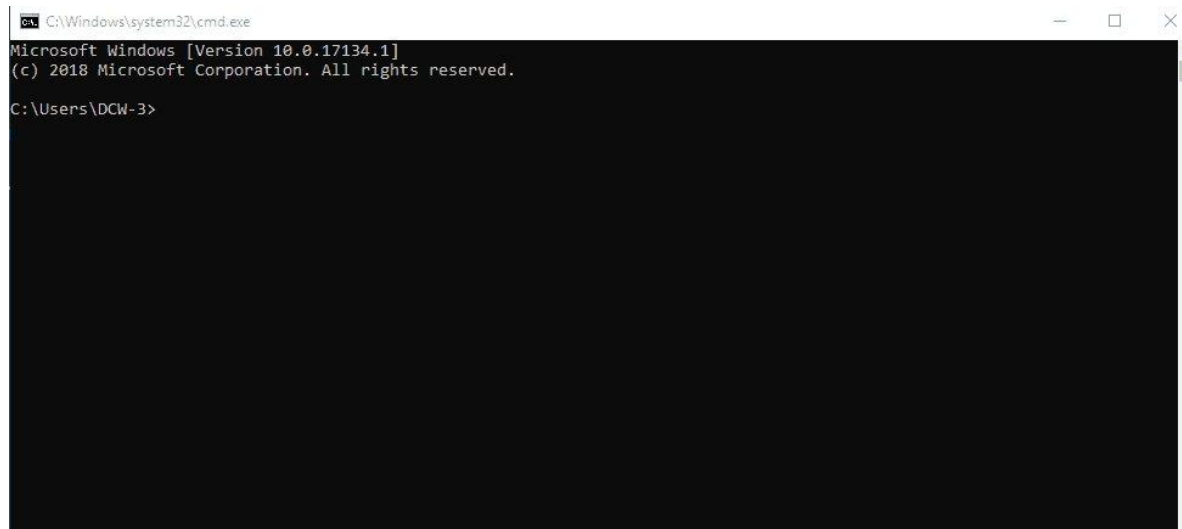

```
dism.exe /online /enable-feature /featurename:HypervisorPlatform /all /norestart
```

VIRTUAL ENVIRONMENTS

How does the Operating system works?

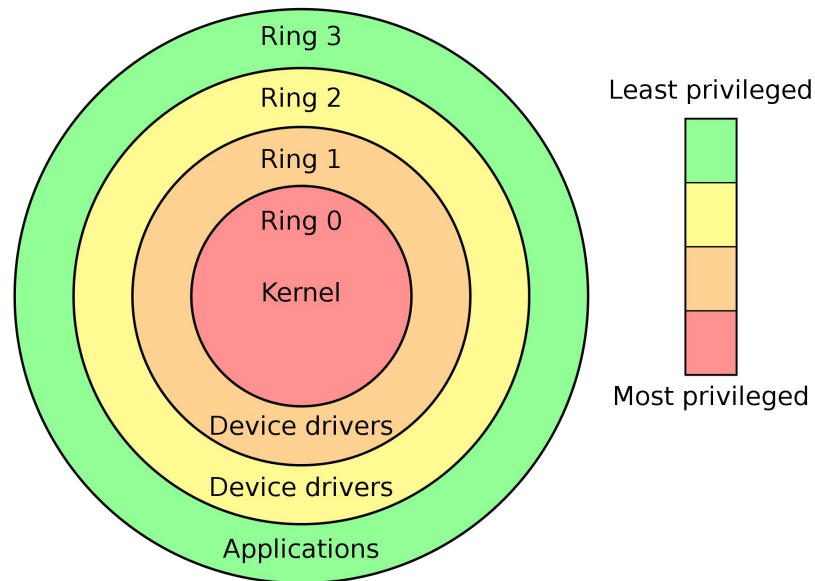

Command Prompt

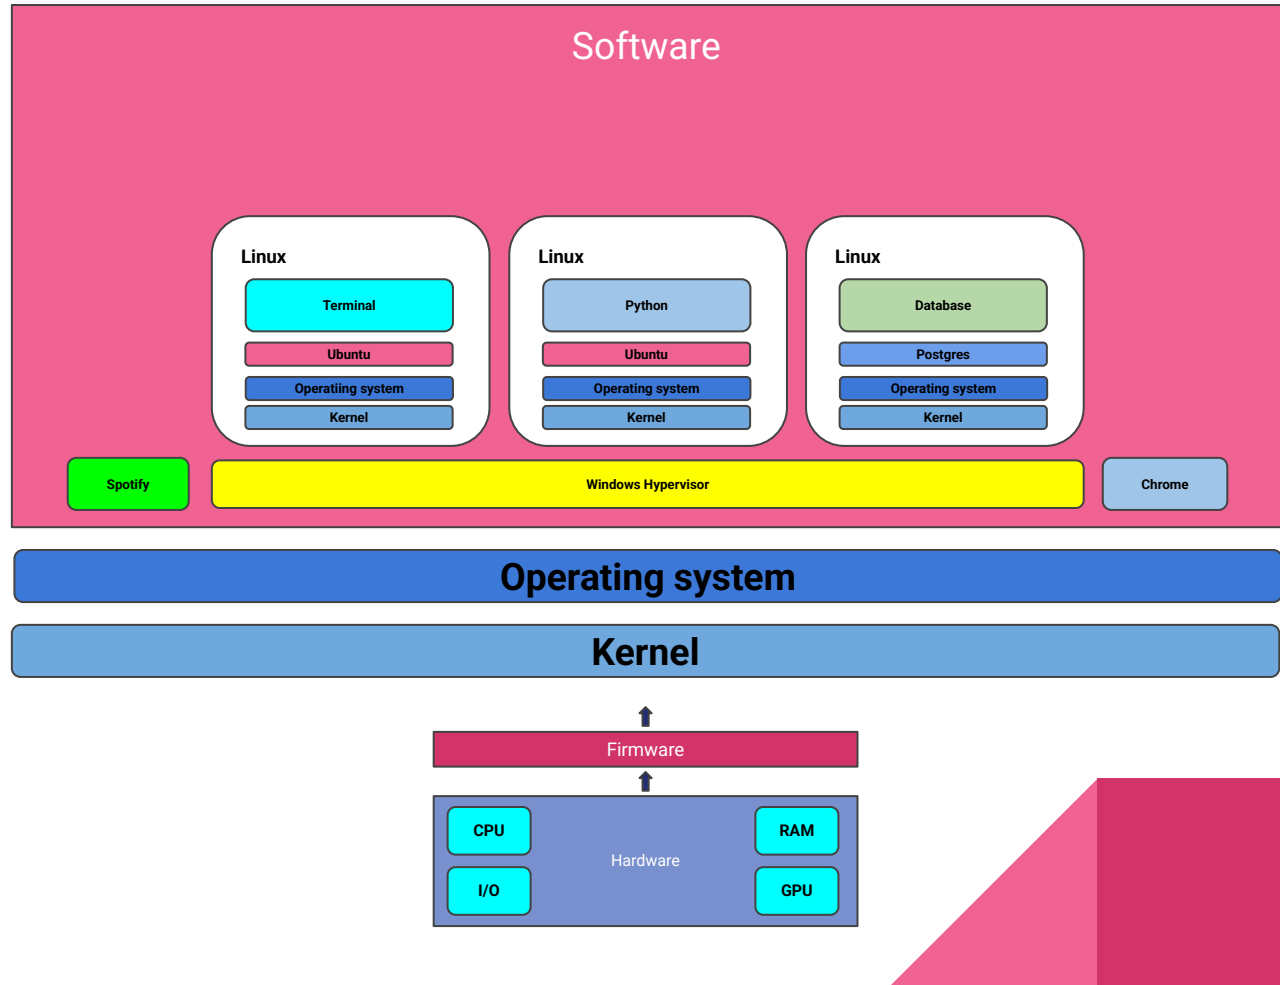

A screenshot of a Windows Command Prompt window. The title bar at the top reads "C:\Windows\system32\cmd.exe". The window has standard Windows window controls (minimize, maximize, close) on the right. The main area is black with white text. The text displayed is: "Microsoft Windows [Version 10.0.17134.1]" followed by "(c) 2018 Microsoft Corporation. All rights reserved." on the next line. Below that, the current directory is shown as "C:\Users\DCW-3>".

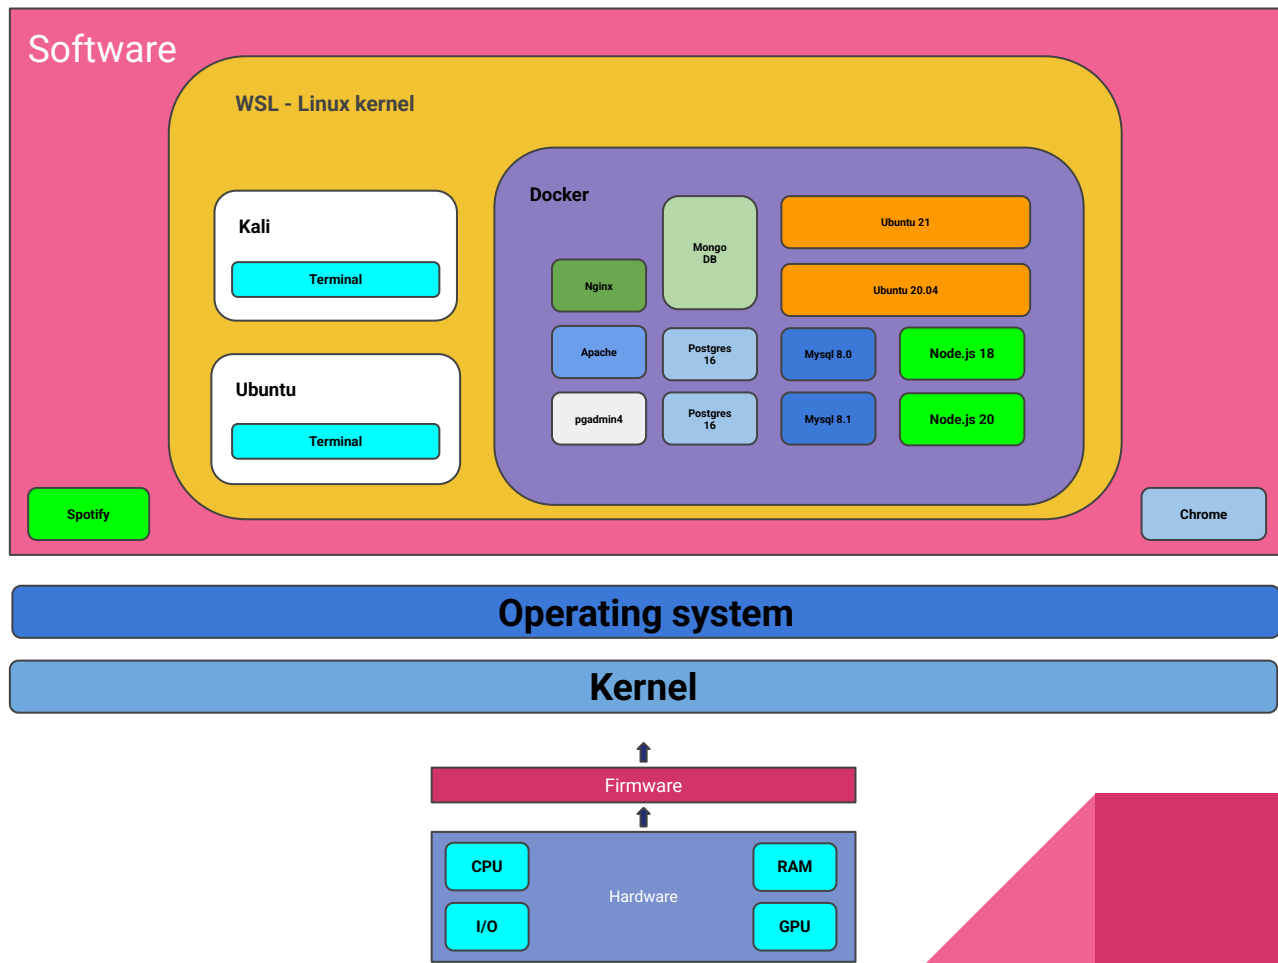

```
C:\Windows\system32\cmd.exe
Microsoft Windows [Version 10.0.17134.1]
(c) 2018 Microsoft Corporation. All rights reserved.
C:\Users\DCW-3>
```
